- Participated and Successfully Completed the “**Data Science using Python**” on December 2024 in Networkz Systems
- Participated and Successfully Completed the “**Concepts on basics Python**” on April 2025 in Coursera

Project Details

Title: Smart Study Group Matcher

Domain: Web Application

Description:

Smart Study Group Matcher is a web-based platform that helps students connect with peers for collaborative study sessions. Students fill out a profile form indicating their subjects, preferred group size, available times, and learning preferences (Quiet, Interactive, Tutor/Helper). A matching algorithm groups students based on common subjects and time availability, ensuring no duplicate groupings. The system runs weekly and allows students to view their groups, access contact information, join or leave groups, and provide feedback.

Title: ATS Resume Matcher

Domain: Web Application

Description:

The **ATS Resume Matcher** is a web-based application designed to help job seekers and recruiters optimize resumes by comparing them with job descriptions using Applicant Tracking System (ATS) algorithms. The system analyzes the content of a resume and a job listing to calculate a match score, highlighting relevant keywords, skills, and experiences. .
